Panic Station Game Aid

Rooms

Any room with an icon in the middle can be searched, which causes it to be flipped to the red side.
Searching or using the Sick Bay or Computer Terminal in a red room will trigger a Parasite Alert.

Sick Bay (1 AP)
Heal 2 wounds per turn. Or heal 1 wound each for your Trooper and Android if they are both present. Flip card to red side.

Parasite Alert
Entering this room attracts a parasite. Roll the D4 and place a parasite in that direction, even through walls and doors. If no gray parasites are free, use a black.

Team Search
Search normally, or if another player's character is present you may draw a card for both them and yourself.

Run
If no other player's character is in this room you may continue with an extra free movement. Searching nullifies this.

Computer Terminal (1 AP)
Choose one per turn. Flip card to red side.
- Heat Scan - each player secretly places their check cards on the scan piles. Red card = infected. Blue = uninfected.
- Open Security Doors - all locked doors are open until the next Parasite Phase.
- Explore Remotely - place a new room adjacent to any existing room.

Storage Room
Searching here the first time yields 3 cards. If a Parasite Alert is drawn it must be resolved before continuing.

Note: some cards contain 2 rooms and moving between them costs 1 AP.

Items

Some items are marked with meaning they may be kept in play for repeat usage.

Gas Can
Use it to fend off an infection attempt. 3 are needed to destroy the Hive.

Keycard
Allows you to move through all secured doors.

Parasite Alert
Triggers a parasite. Roll the D4 and place the parasite where directed.

Energy Boost
Gives you 2 extra AP this turn. You may use multiple Energy Boosts in a turn.

First Aid Kit
Heal 2 wounds to yourself or another team member in the same room.

Body Scanner (1 AP)
Check another player's identity by looking at their hand of cards.

Ammo
Androids carry a gun by default, but Ammo is required. Discard when count reaches 0.

Armor
Prevents 1 damage from knife, gun or parasite. Can play out of turn.

Target Scope
Android may fire default or Heavy gun into adjacent room. Unusable with Sniper Rifle.

Heavy Gun (1 AP)
Android can fire 2 shots at once. Fire at single or 2 different targets. Uses 2 Ammo.

Combat Knife (1 AP)
Trooper and Android can roll the D4 and on 3+ inflict 1 wound on the victim.

Grenade (1 AP)
Inflicts 1 wound on all characters and parasites in an adjacent room.
